SPECTROCHIMICA ACTA
PART B: ATOMIC SPECTROSCOPY

CONTENTS OF VOLUME 43B, 1988

No. 1

Needs for Fundamental Reference Data for Analytical Atomic Spectroscopy

Proceedings of a Workshop held in Scarborough, Ontario, Canada

A. Scheeline	1	Needs for fundamental reference data for analytical atomic spectroscopy: what we lack–why it matters. Preface of the Proceedings of a Workshop
P. W. J. M. Boumans	5	Needs for fundamental atomic reference data and data distribution: applied analytical spectroscopy—response to a questionnaire
A. Scheeline	15	Needs for fundamental atomic reference data and data distribution: fundamental analytical spectroscopy—response to a questionnaire
J. Sugar	21	National Bureau of Standards Atomic Data Centers: review of recent and imminent publications
R. J. Lovett	25	The importance of fundamental reference data in analytical atomic spectroscopic simulations
M. W. Blades	35	Fundamental reference data and the inductively coupled plasma
J. M. Mermet	45	Availability and accuracy of atomic data for plasma spectrochemistry
C. J. Seliskar	51	Fundamental reference data for understanding analytical plasmas—what's missing
A. Scheeline	57	Needs for fundamental atomic reference data: graphite furnaces and transient plasmas
N. Omenetto	63	Need for fundamental data in atomic fluorescence spectrometry

P. W. J. M. Boumans and J. J. A. M. Vrakking 69 Line selection in atomic emission spectrometry using physically resolved spectra

M. L. Parsons and B. A. Palmer 75 Fundamental data to be obtained with the Los Alamos Fourier Transform Spectrometer

C. Trassy and J. Robin 79 Software for automatic qualitative analysis and determination of elements by atomic emission spectroscopy with recognition of spectral interferences

R. K. Winge, V. A. Fassel and M. C. Edelson 85 Capabilities of a photodiode array based system for cataloguing the atomic emission spectra of the inductively coupled plasma

S. R. Goode 93 Automated access to spectrochemical databases

P. W. J. M. Boumans 103 Needs for fundamental atomic reference data and data distribution—a collage of discussions

i *Aims and Scope*

No. 2

D. C. Baxter 129 Experimental and theoretical intensities for graphite furnace atomic emission spectrometry

Wang Pingxin, Zhang Weimin, Xiong Guoxing and Lin Tiezheng 141 Investigation of the atomization mechanism of copper in a graphite furnace using X-ray photoelectron spectroscopy

R. F. M. Herber and H. J. Pieters 149 Computer aided signal analysis in electrothermal atomization-atomic absorption spectrometry—accuracy and precision: peak height vs peak area

H. Matsuta and K. Hirokawa 159 Coherent forward scattering (CFS) resonance monochromator in Voigt configuration

J. P. Matousek and H. K. J. Powell 167 Mechanism for atomization of vanadium in the pyrolytic graphite-coated furnace

P. W. J. M. Boumans, J. A. Tielrooy and F. J. M. J. Maessen 173 Mutual spectral interferences of rare earth elements in inductively coupled plasma atomic emission spectrometry—I. Rational line selection and correction procedure

No. 3

P. W. J. M. Boumans 221 The scientific community and the publisher —an editor's reflections on the occasion of a jubilee and a birthday

225 Presentation of Spectrochemical Award to Professor Winefordner

A. Kuczumow, G. Holland and W. Stankiewicz 227 Novel theoretical analyses of some features of X-ray spectrometry—I. Tertiary effects in XRF analysis

A. Kuczumow and G. Holland 233 Novel theoretical analyses of some features of X-ray spectrometry—II. Concentration corrections using the lines of only a limited number of elements

G. Zaray, J. A. C. Broekaert and F. Leis 241 The use of direct sample insertion into a nitrogen–argon inductively coupled plasma for emission spectrometry—I. Technique optimization and application to the analysis of aluminium oxide

G. Zaray, P. Burba, J. A. C. Broekaert and F. Leis 255 The use of direct sample insertion into a nitrogen–argon inductively coupled plasma for emission spectrometry—II. Determination of trace elements in high-purity aluminium after preconcentration on cellulose collectors

J. R. Castillo, J. M. Mir and C. Bendicho 263 Effect of matrix components on chromium atomization processes in graphite furnace atomic absorption spectrometry

Lu Pei-qi, Gong Pei-zhong, Lin Tie-zheng and R. S. Houk 273 Langmuir probe measurements of electron temperature in an inductively coupled plasma

Technical Notes

Chen Shuyin and Lu Yunlong 287 A novel type of concentric glass nebulizer for an analysis of solutions with high salt con-

tent by inductively coupled plasma atomic emission spectroscopy

G. Vujicic and I. Steffan 293 Argon-thermostated spray chamber for ICP spectrometers

Analytical Note

U. Stahlberg and G. Ehrlich 295 Application of matrix group-specific relative sensitivity factors to quantification of spark source mass spectrographic analyses of iron and low-alloyed steels

Analytical Spectroscopy Highlighted

Invited Papers from the XXVth Colloquium, Spectroscopicum Internationale, Hilton Harbour Castle, Toronto, Canada

J. D. Winefordner 303 Preface

L. L. Burton and M. W. Blades 305 Computer simulation of spectral interferences in inductively coupled plasma-optical emission spectroscopy

J. A. M. van der Mullen, S. Nowak, A. C. A. P. van Lammeren, D. C. Schram and B. van der Sijde 317 Non equilibrium characterization and spectroscopic analysis of an inductively coupled argon plasma

P. E. Walters and C. A. Barnardt 325 The role of desolvation and hydrogen addition on the excitation features of the inductively coupled plasma

J. A. C. Broekaert, F. Leis, B. Raeymaekers and Gy. Zaray 339 A study of some techniques for direct solids sampling in plasma spectrometry

L. Ebdon and A. R. Collier 355 Particle size effects on kaolin slurry analysis by inductively coupled plasma-atomic emission spectrometry

S. Caroli 371 The role of ICP spectrometry in human health and environment protection

Benli Huang, Xianjin Zeng, Zhuoyong Zhang and Jian Liu	381	Recent studies on inductively coupled plasma sample introduction—I. Hydride generation
Sun Dahai, Zhang Zhanxia, Qian Haowen and Cai Mingxiang	391	Matrix effects due to metallic elements in inductively coupled plasma emission spectrometry
Shiuh-Jen Jiang and R. S. Houk	405	Inductively coupled plasma mass spectrometric detection for phosphorus and sulfur compounds separated by liquid chromatography
J. W. McLaren, D. Beauchemin and S. S. Berman	413	Analysis of the marine sediment reference materials PACS-1 by inductively coupled plasma mass spectrometry
R. E. Sturgeon and H. Falk	421	Spectroscopic measurement of carbon monoxide in a graphite furnace
M. T. C. de Loos-Vollebregt and L. de Galan	439	Furnace design in electrothermal atomization-atomic absorption spectrometry
E. Lundberg, W. Frech, D. C. Baxter and A. Cedergren	451	Spatially and temporally constant-temperature graphite furnace for atomic absorption/emission spectrometry
O. A. Güell and J. A. Holcombe	459	Monte Carlo optimization of graphite furnace geometry and sample distribution for copper
K. Kitagawa, W. Kuwayama and Y. Ito	481	Atomic magneto-optical rotation spectroscopy (AMORS) with magnetic field modulation and an offset angle
G. I. Bekov, V. N. Radayev and V. S. Letokhov	491	Laser photoionization spectroscopy of atomic traces at part per trillion levels
F. R. Preli, Jr, J. P. Dougherty and R. G. Michel	501	Diagnostic studies of the Zeeman effect for laser excited atomic fluorescence spectrometry in an electrothermal atomizer
M. A. Bolshov, A. V. Zybin, V. G. Koloshnikov and I. I. Smirenkina	519	Analytical applications of a LEAFS-ETA method
S. M. Kimbrell and E. S. Yeung	529	Spatial and temporal particle distributions in a laser generated plume
B. L. Maschhoff, K. W. Nebesny, K. R. Zavadil, J. W. Fordemwalt and N. R. Armstrong	535	Quantitation of surface electron spectroscopies: problems in correct description of intrinsic lineshape and extrinsic energy loss processes
A. Scheeline and J. S. White	551	Development of theta pinch discharges for emission spectrochemical analysis

V. Majidi, W. Hsu and D. M. Coleman 561 Number density measurements on analytical discharge systems: application of "hook" spectroscopy

J. H. Perkins, B. Tenge and D. E. Honigs 575 Resolution enhancement using an approximate-inverse Savitzky–Golay smooth

T. Vo-Dinh, A. Alak and R. L. Moody 605 Recent advances in surface-enhanced Raman spectrometry for chemical analysis

R. L. Garrell and K. D. Beer 617 Surface-enhanced Raman spectroscopy as a probe of macromolecules

D. W. Millican, K. Nithipatikom and L. B. McGown 629 Multidimensional data formats in phase-resolved fluorescence spectroscopy

N. J. Dovichi, F. Zarrin, T. G. Nolan and D. J. Bornhop 639 Laser detectors for capillary liquid chromatography

M. P. Thomas, G. Nelson, G. Patonay and I. M. Warner 651 Analysis of drug binding sites on human serum albumin using multidimensional fluorescence measurements

T. Imasaka and N. Ishibashi 661 Supersonic jet spectrometry of aromatic hydrocarbons

Ho Ming Pang, Chung Hang Sin and D. M. Lubman 671 Supercritical fluid jet expansions of polar aromatic carboxylic acids using simple derivatization with detection by resonant two-photon ionization

E. Sekreta, K. Owens, A. Engel and J. P. Reilly 679 Applications of laser ionization spectroscopy

R. M. Miller 687 Applications of impulse response photo-acoustic spectroscopy to the characterisation of dynamic physicochemical systems

Note

T. Imasaka, K. Sakaki and N. Ishibashi 703 Evaluation of chemical structure from sharp line structure in supersonic jet spectrum

Announcements

P. W. J. M. Boumans and K. Niemax 711 Editorial—New column: Topics in Laser Spectroscopy

Invited Review

713 Curricula Vitae of G. S. Hurst and M. G. Payne

G. S. Hurst and M. G. Payne 715 ***Topics in Laser Spectroscopy:*** Elemental analysis using resonance ionization spectroscopy

I. Magnusson 727 ***Topics in Laser Spectroscopy:*** The applicability to trace element analysis of laser-enhanced ionization spectroscopy in a graphite furnace

A. Kuczumow 737 Novel theoretical analyses of some features of X-ray spectrometry—III. Concentration correction equations derived for scattered radiation

A. Kuczumow and G. Holland 743 Novel theoretical analyses of some features of X-ray spectrometry—IV. A semiempirical method for the determination of detection limits in XRF and electron microprobe

B. Welz, B. Radziuk and G. Schlemmer 749 Evaluation of a mathematical model for peak interpretation in graphite furnace atomic absorption spectrometry based on free analyte atom redeposition on carbon surfaces

S. Akman, S. Bektas and O. Genc 763 A novel approach to the interpretation of graphite furnace atomic absorption signals

M. T. C. de Loos-Vollebregt, J. J. Tiggelman and L. de Galan 773 End-on observation of a horizontal low-flow inductively coupled plasma

T. Hashemi and C. A. Hogarth 783 ***Topics in Surface and Depth Profile Analysis:*** X-ray induced Auger spectroscopy of the surface films formed by benzotriazole on zinc and zinc alloys

N. S. Ham and T. McAllister 789 Graphite furnace mass spectrometry of cobalt

J. C. Valognes, J. P. Bardet and P. Mergault 799 Contribution à l'interprétation des processus émissifs dans un plasma électrolytique tel que celui obtenu par effet d'anode dans le mélange équimoléculaire LiCl–KCl fondu

F. Bosch Reig, T. Domenech Carbó, V. Peris Martinez and J. V. Gimeno Adelantado 811 Limit dilution method: determination of correction factors for resolving matrix effects in X-ray fluorescence analysis

E. L. Bydder and G. P. Miller 819 A relaxation method for determining state of equilibrium and temperature ratio T_e/T_g in an argon ICPT

K. Wagatsuma and K. Hirokawa 831 Selective detection of emission lines from sputtered particles in glow discharge plasma with a modulated hollow cathode lamp

K. A. Marshall and G. M. Hieftje 841 Thomson scattering for determining electron concentrations and temperatures in an inductively coupled plasma—I. Assessment of the technique for a low-flow, low-power plasma

K. A. Marshall and G. M. Hieftje 851 Thomson scattering for determining electron concentrations and temperatures in an inductively coupled plasma—II. Description and evaluation of a multichannel instrument

Analytical Note

G. Vujičić, S. Vukičević, J. D. Steiner, M. Široki, A. Stavljenić and M. J. Herak 867 Method for the determination of carbonate by the introduction of CO_2 into an inductively coupled plasma

ALKEMADE ISSUE

Physics and Spectroscopy: A Flaming Interaction

Dedicated to Kees Alkemade on the Occasion of his 65th Birthday

P. Boumans	989	Preface
C. Th. J. Alkemade	995	An amateur's adieu
	1007	List of publications authored or co-authored by C. Th. J. Alkemade
J. A. Smit	1015	Recollections of the work of Kees Alkemade
J. D. Winefordner and N. Omenetto	1017	On the influence of Kees Alkemade on the development and use of atomic fluorescence spectrometry and signal-to-noise ratio in analytical chemistry
J. B. Willis	1021	1954 revisited—thoughts on reading the thesis of C. Th. J. Alkemade
Tj. Hollander and J. A. Smit	1029	Spectral intensity measurements, flame research and C. Th. J. Alkemade
P. Hannaford and A. Walsh	1053	Sputtered atoms in absorption and fluorescence spectroscopy
R. W. Berends, W. Kedzierski, J. B. Atkinson and L. Krause	1069	***Topics in Laser Spectroscopy:*** The radiative lifetimes of the potassium 5*P*, 6*P* and 7*P* states
A. Fontijn	1075	Spectrometric measurements of the kinetics of individual atom and radical reactions in the 300–1900 K temperature range
S. Greenfield, M. S. Salman and J. F. Tyson	1087	Atomiser, source, inductively coupled plasmas in atomic fluorescence spectrometry (ASIA): a study of chemical and ionisation interference effects
N. Omenetto, M. Leong, C. Stevenson, J. Vera, B. W. Smith and J. D. Winefordner	1093	***Topics in Laser Spectroscopy:*** Fluorescence dip spectroscopy of sodium atoms in an inductively coupled plasma
H. Falk, H.-J. Paetzold, K. P. Schmidt and J. Tilch	1101	***Topics in Laser Spectroscopy:*** Analytical application of laser excited atomic fluorescence using a graphite cup atomizer
N. Omenetto, B. W. Smith and J. D. Winefordner	1111	***Topics in Laser Spectroscopy:*** Laser induced fluorescence and electrothermal atomization: how far from the intrinsic limit of detection?

M. F. Hineman and S. R. Crouch	1119	***Topics in Laser Spectroscopy:*** Modeling signals, background and noise in flame laser-induced ionization spectroscopy
J. B. Dawson, R. J. Duffield, P. R. King, M. Hajizadeh-Saffar and G. W. Fisher	1133	Signal processing in electrothermal atomization atomic absorption spectroscopy (ETA-AAS)
B. V. L'vov, V. G. Nikolaev, A. V. Novichikhin and L. K. Polzik	1141	Effect of platform material on sample vaporization rate in graphite furnace atomic absorption spectrometry
M. T. C. de Loos-Vollebregt, L. de Galan and J. W. M. van Uffelen	1147	Longitudinal a.c. Zeeman AAS with a transverse heated graphite furnace
D. C. Manning and W. Slavin	1157	The determination of thallium with the stabilized temperature platform furnace and Zeeman background correction
J. P. Matousek and H. K. J. Powell	1167	Electrothermal atomization of chromium in the presence of metal halides: enhancement effects arising from thermal pretreatment processes
P. L. Larkins	1175	The effect of spectral line broadening on the shape of analytical curves obtained using pulsed hollow-cathode lamps for background correction
B. Welz, M. Sperling, G. Schlemmer, N. Wenzel and G. Marowsky	1187	Spatially and temporally resolved gas phase temperature measurements in a Massmann-type graphite tube furnace using coherent anti-Stokes Raman scattering
N. G. Preobrazhensky and L. G. Velikanova	1209	Inversion of line intensities emitted by an axially symmetric absorbing plasma
C. A. Monnig, K. A. Marshall, G. D. Rayson and G. M. Hieftje	1217	Tomographic image reconstruction techniques for spectroscopic sources—I. Theory and computer simulations
S. Nowak, J. A. M. van der Mullen and D. C. Schram	1235	Electron density and temperature determination in an ICP using a non-equilibrium concept
R. Stephens	1247	Detection of structured background interferences by magneto-optic rotation
H. Matsuta and K. Hirokawa	1255	Coherent forward scattering resonance monochromator in a pulsed glow discharge mode
		Analytical Note
W. Grimm, G. Hermann, M. Jung, R. Krüger, G. Lasnitschka, A. Scharmann and M. Seib	1269	Coherent forward scattering spectrometry by means of a commercial furnace electromagnet unit

G. H. Lee, J. P. Shields and E. H. Piepmeier 1273 Analytical characterization of sample entraining multi-electrode plasma sources for atomic emission spectroscopy—I. Preliminary studies

T. Kántor 1299 Interpreting some analytical characteristics of thermal dispersion methods used for sample introduction in atomic spectrometry

A. Canals, J. Wagner, R. F. Browner and V. Hernandis 1321 Empirical model for estimating drop size distributions of aerosols generated by inductively coupled plasma nebulizers

W. W. van Berkel and F. J. M. J. Maessen 1337 Use of evaluation of poly(dithiocarbamate) in electrothermal vaporization inductively coupled plasma atomic emission spectrometry for simultaneous trace analysis of seawater and related biological materials

D. Bax, J. Agterdenbos, E. Worrell and J. Beneken Kolmer 1349 The mechanism of transition metal interference in hydride generation atomic absorption spectrometry

J. S. Crain, R. S. Houk and F. G. Smith 1355 Matrix interferences in inductively coupled plasma-mass spectrometry: some effects of skimmer orifice diameter and ion lens voltages

P. W. J. M. Boumans, J. J. A. M. Vrakking and A. H. M. Heijms 1365 Mutual spectral interferences of rare earth elements in inductively coupled plasma atomic emission spectrometry—II. Approach to the compilation and use of pseudo physically resolved spectral data
